

Solution 1: Wirelessly connect a complex array of safety and activation devices using a BTR Door Controller.

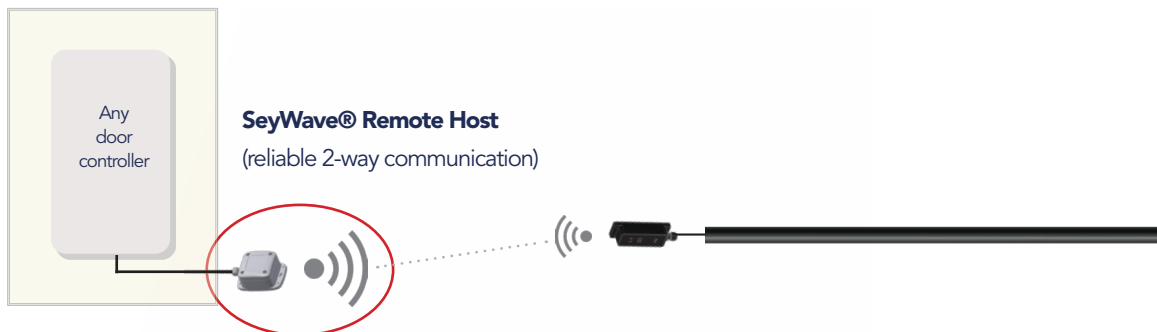

SeyWave® Internal Host (built into BTRs DGII® & DG-Mini®)

Solution 2: Wirelessly connect multiple safety and activation devices to any existing controller by adding a SeyWave® External Host.

SeyWave® External Host (6 outputs)

Solution 3: Wirelessly connect your safety device to any existing controller by adding a Seywave® Remote Host.

SeyWave® Remote Host
(reliable 2-way communication)
