

SeyWave® Wireless System

Wireless safety and activation devices for industrial doors and gates.

BTR's proprietary **SeyWave® Wireless Technology** provides fast, reliable communication for industrial doors and gates. It ensures ultra-low power consumption for extended battery life and long-range, even in industrial environments. SeyWave® Wireless technology is offered in many safety and activation products and can be easily connected directly to BTR's DGII® or DG-MINI® controllers, or retrofitted to existing equipment with a SeyWave® Host.

ENHANCES SAFETY

Battery level is continuously monitored for immediate feedback. All communication between devices is two-way and acknowledged, ensuring a dependable connection for maximum safety.

DURABLE DESIGN

The electronics and battery are housed in a durable package that offers maximum environmental and physical protection to withstand the harsh environments typically found in industrial facilities.

EASY INSTALLATION AND USE

Setup is extremely easy. Pairing requires only the push of a button. Multiple installations within the same area can coexist without interference.

TROUBLE-FREE MAINTENANCE

All remote devices are AA battery-operated with up to a 10-year battery life. A low battery indicator from the remote devices helps maintain system functionality.

The SeyWave® Wireless System includes:

The **SeyWave® Wireless System** is designed as an FCC-listed transceiver that can be used in any application. Pair with a Wireless Host or Remote Host plus a DGII® Door Controller and multiple sensor and access control devices to create your own custom solution.
